

STAMFORD® & AvK® POWER PORTFOLIO

The ultimate alternator solution
Anytime, anywhere

STAMFORD | AvK™

POWERING TOMORROW, TOGETHER

THE ULTIMATE RANGE

We are here to support your future decarbonisation goals, through our end-to-end expertise in versatile solutions. Backed by the reassurance of our world-renowned brands recognised for reliability and complete peace of mind, we are with you on your journey towards sustainability.
stamfordavk.li/future-ready

STAMFORD® S-RANGE

3 YEAR WARRANTY

Utilising wire-wound technology and with an output extending from 7.5 to 5,600kVA, genuine STAMFORD® alternators are designed for delivering superior efficiencies in marine, oil and gas auxiliary, UPS, telecoms, CHP, construction and other continuous or standby power applications. STAMFORD alternators are available with a choice of SAE adaptors to ensure easy coupling to a wide range of prime movers. All STAMFORD S-Range is fitted with CoreCooling™ Technology.

Prime Movers

Diesel and Gas, Steam and Gas Turbine and are future ready for Hydrogen and Battery Hybrid systems and other decarbonised technologies
 Engine compatibility: all brands and nodes

Common Features

Technology: Wire wound
 Protection: IP23 as standard
 Open ventilated construction

Designed For

Prime Power, Standby, Marine, Oil and Gas Auxiliary, Mining, Critical Protection and UPS, Combined Heat and Power, Telecoms, Mobile Construction

Classifications

Compatible with Industrial Standards:

Compatible with Marine Classifications:

AvK®

With a robust bar wound configuration, AvK® alternators are robustly engineered products up to 8,500kVA, specifically designed to meet the challenges of the most arduous applications and environments - be it in extraction of oil and gas, coal and minerals, critical marine power to tankers and container vessels. Our extensive experience and knowledge gathered from a large number of diverse alternator installations worldwide provides expertise in offering integrated design solutions that helps our customers compete more successfully throughout the world.

Prime Movers

Designed to couple with: Diesel Engine, Gas Engine, Steam Turbine, Gas Turbine
 Diesel Engine compatibility: all brands and nodes

Common Features

Technology: Bar wound
 Protection: IP23 as standard with higher IP ratings available as options
 Totally enclosed construction
 Highly configurable design

Designed For

Prime Power, Power Plants, Marine, Oil and Gas, Mining

Classifications

Compatible with Industrial Standards:

Compatible with Marine Classifications:

QUICK ALTERNATOR SELECTOR

Use the Quick Alternator Selector to determine which alternator you need for your power project.

Key

- Low Voltage
- Medium/High Voltage

Ratings based on Maximum continuous rating at 50Hz

*Rating based on Maximum continuous rating at 60Hz

1 Determine your power requirements and find the desired kVA or kW along the axis

2 Follow the curve until you find a alternator that matches your power and voltage requirement

3 Read the label of your selected alternator to see which page it is featured on for more information

To attain further technical specifications of your selected alternator, visit the STAMFORD | AvK Product Selector at www.stamford-avk.com/alternators/product-selector

GLOBAL PEACE OF MIND

INDUSTRY LEADING TECHNICAL SUPPORT

It's what we do

From pre-sales application support all the way through to engineers servicing your STAMFORD® or AvK® alternators, we're there for you. For over 100 years and counting, we provide our proven support we've delivered for our customers, globally.

Selecting the right alternator for the right application

In today's complex world our goal is to make your life simpler - by using our unrivaled experience to provide solutions to your challenges. With a rich, proven history of helping our customers become efficient, we understand the performance requirements that each application and operating environment demands. Our knowledgeable, experienced applications engineers align individual customers' power needs with the most suitable alternator specification.

Application Engineering Training

We offer a wide range of alternator application training courses to help our customers in the design and operation of our products.

Our training packages can be fully customised to meet your training requirements. We are completely flexible and can adapt any of our training courses to ensure we deliver material that suits your business objectives. From the very basics of electrical fundamentals to complex alternator sizing we will aim to deliver training to meet the specified requirements of the delegates.

Our training courses can be conducted in-house or locally at customer premises.

One Global Service Network

Our professional engineers are widely recognised in the industry as experts in electrical, electronic and mechanical engineering. They in turn are supported by a common worldwide spares and service network for all STAMFORD® and AvK® alternators.

What that means to you

- Experienced "Factory" engineers and trained local Dealer network to respond immediately to rectify customer onsite problems
- Quotations for inspection, commissioning and refurbishment of alternators at the customer site
- AVR & accessory set-up on site
- STAMFORD and AvK parts identification
- Extensive Aftermarket network distribution for genuine STAMFORD and AvK parts
- Extensive aftermarket distribution for genuine STAMFORD and AvK parts
- Quotations for extended warranty
- Quotations for Genset installation and coupling alignment checks

Service Training

Product familiarity will ensure maximum productivity and optimum use of the alternator. Our Service Training teams offer service training courses for engineers, operators and service and support staff. Each course is individually tailored to suit the needs of the customer, the generator set builder or the end-user. Product familiarisation courses, with a choice of training modules - including alternator control systems, applications, trouble-shooting, maintenance or other specific requirements - are also available.

For further information on service training contact stamford-avkservicetraining@cummins.com

Aftermarket Parts

STAMFORD and AvK alternators are supported around the world by global authorised parts dealers who can supply genuine parts for STAMFORD or AvK alternators.

Always source parts from our Authorised Dealers: stamford-avk.com/parts

ACCESSORIES

GLOSSARY

Current Sensing Kit

Assists the AVR to achieve accurate voltage regulation when supplying loads at the end of long cable runs.

Separate Voltage Trimmer

Provides remote fine adjustment of the alternator output voltage.

Paralleling Kit

Quadrature Droop provides a drooping characteristic, when paralleling alternators, ensuring the load is shared in proportion to the alternator outputs.

RFI Suppressor Kit

Reduces the radiated RFI signal from the alternator to enable compliance with various high level EMC standards.

Excitation Loss Module

Detects loss of excitation, not easily detectable by other means, when alternators are running in parallel. This unit switches a single pole change over contact which can be incorporated into an external protection system.

Manual Voltage Regulator

Controls the alternator output voltage manually under emergency conditions. This must be in conjunction with the PMG type control system.

Frequency Detection Module

Senses frequency, and hence rotational speed, can be used to disengage the starter when engine fires, and to shut down the engine in event of overspeed.

Power Factor Controller

Controls and maintains a required power factor condition whilst running in parallel with a mains supply. This unit also incorporates a voltage matching facility for use with basic automatic synchronising equipment.

Alternator Protection Module

Detects overload conditions by measuring voltage discrepancies in the alternator phase voltages. On fault detection, the unit switches a change over contact; this could be incorporated to trip a circuit breaker, stop the engine, or de-excite the alternator.

Diode Failure Detector

On detection of a failed rotating diode this module switches a change over contact. This could either trigger an alarm or automatically shut down the set.

Excitation Circuit Breaker

Circuit breaker which is tripped by a signal from the MX322™ AVR overvoltage detection circuit.

Dual AVR System

Used for manual switching between two AVRs where the specification calls for the provision of a backup AVR.

AVRs

We offer a wide selection of AVR's (Automatic Voltage Regulator) which are suitable for use with many of the products within the alternator range. The AVR is the heart of the alternator and maintains the steady state output voltage within close limits during operation. The AVR's include the latest technology to provide the highest level of performance during all operating conditions.

All AVR's are encapsulated to provide protection against moisture, salt and sand in the atmosphere and mounted on anti-vibration mounts for mechanical protection from engine vibration.

The importance of genuine parts

STAMFORD | AvK™ offer a complete range of analogue and digital AVRs, and all other parts designed to match your application.

Only genuine STAMFORD® and AvK® parts should be used to avoid expensive repair costs and under-performance of your STAMFORD or AvK alternator. Always source parts from our Authorised Parts and Service Dealers:

Temperature monitoring	Winding RTDs
Connection with other machines	Paralleling capability

Optional Features	
Bearing Arrangement	Sleeve Bearings
Ingress Protection	IP23 Air Filters
Ingress Protection	IP44/54/55 Totally enclosed
Cooling options	CACA/CACW
Environmental protection	Anti-condensation Heaters

Designed For	
Power Plant	
Grid Code Compatible	
Marine Propulsion	●
Marine Auxiliary	●
Oil & Gas	●
Combined Heat & Power	●
Critical Protection & UPS	●
Continuous Power & Standby	●

Prime Movers

 **60Hz 480V Continuous 125/40°C

DIMENSIONS

Drawings represent standard design - All dimensions in millimetres (mm)

AvK® DSG 125

Model	DSG 125
Maximum continuous rating at 50Hz (kVA)*	7,000
Maximum continuous rating at 60Hz (kVA)**	8,500

Specifications	
Voltage Range	690
Poles	8, 10
Technology	Bar Wound
AVR	Digital
Voltage sensing	3-Phase
Bearing Arrangement	Double (Sleeve Bearings)
SAE Adaptors	0, 00
Terminals	6
Material Insulation Class	H
Excitation System	Auxiliary Winding
Ingress Protection	IP44
Temperature monitoring	Winding RTDs
Connection with other machines	Paralleling capability

Optional Features	
Ingress Protection	IP54/55 Totally enclosed
Cooling options	CACW
Environmental protection	Anti-condensation Heaters

Designed For	
Power Plant	
Grid Code Compatible	
Marine Propulsion	●
Marine Auxiliary	●

AvK® DSG 144

Model	DSG 144
Maximum continuous rating at 60Hz (kVA)**	6,600

Specifications	
Voltage Range	690
Poles	10
Technology	Bar Wound
AVR	Digital
Voltage sensing	3-Phase
Bearing Arrangement	Double (Sleeve Bearings)
SAE Adaptors	0, 00
Terminals	6
Material Insulation Class	H
Excitation System	Auxiliary Winding
Ingress Protection	IP44
Temperature monitoring	Winding RTDs
Connection with other machines	Paralleling capability

Optional Features	
Ingress Protection	IP54/55 Totally enclosed
Cooling options	CACW
Environmental protection	Anti-condensation Heaters

Designed For	
Power Plant	
Grid Code Compatible	
Marine Propulsion	●

AvK® DIG 110

Model	DIG 110
Maximum continuous rating at 50Hz (kVA)*	1,080
Maximum continuous rating at 60Hz (kVA)**	1,300

Specifications	
Voltage Range	3,300-11,000
Poles	4
Technology	Bar Wound
AVR	Digital
Voltage sensing	3-Phase
Bearing Arrangement	Double
SAE Adaptors	1, 0, 00
Terminals	6
Material Insulation Class	F
Excitation System	Auxiliary Winding
Ingress Protection	IP23
Temperature monitoring	Winding RTDs
Connection with other machines	Paralleling capability

Optional Features	
Bearing Arrangement	Sleeve Bearings
Ingress Protection	IP23 Air Filters
Ingress Protection	IP44/54/55 Totally enclosed
Cooling options	CACA/CACW
Environmental protection	Anti-condensation Heaters

OUR POWER PROMISE

STAMFORD®

AvK®

WORLD-CLASS EXPERTISE
FOR EVERY SOLUTION

GLOBAL PRESENCE
WORLDWIDE AVAILABILITY TO MEET LOCAL NEEDS

DEDICATED 24/7 SUPPORT
COMPLETE PEACE OF MIND

FUTURE READY
TECHNOLOGY AND KNOW-HOW IN YOUR JOURNEY TOWARDS DECARBONISATION AND SUSTAINABILITY

As the world's energy demands evolve, the power generation industry require ever more dependable solutions, tailored to tomorrow's needs.

At STAMFORD | AvK™, we provide the pioneering innovation, world-class expertise and global lifecycle support you need. As a result, you can operate with greater certainty and compete more successfully.
